

Back Pain — Companion Figures

Watch this video: <https://youtu.be/0qR-Yfw>

Cervical (C) spine
(normal lordosis)

Thoracic (T) spine
(normal kyphosis)

Lumbar (L) spine
(normal lordosis)

Figure L1.1 — Lateral spine: cervical & lumbar lordosis, thoracic kyphosis

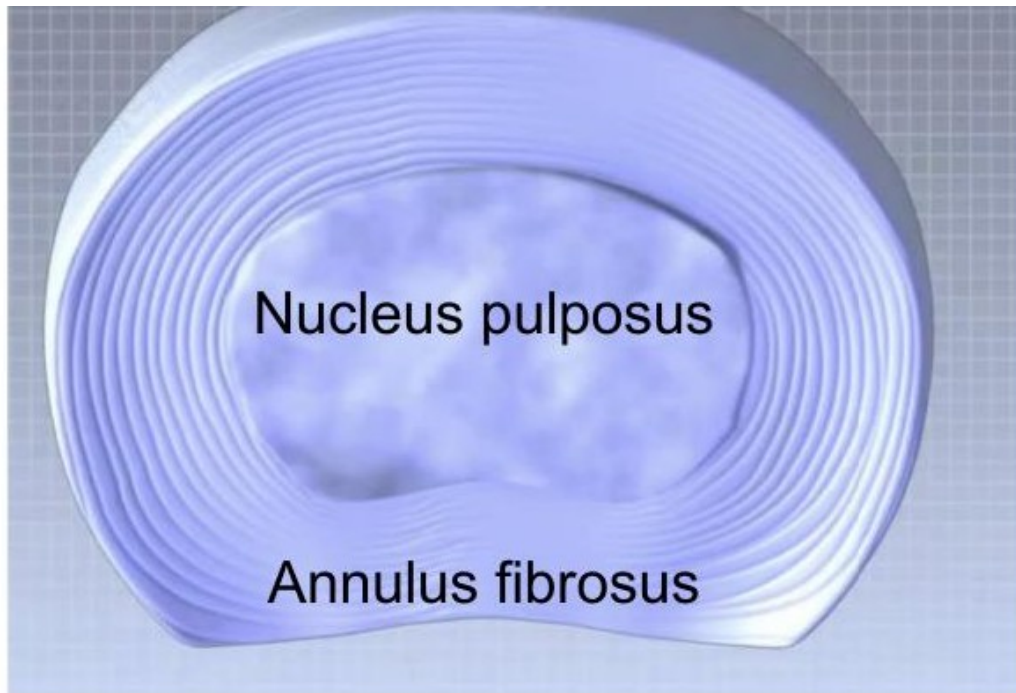

Figure L1.3 — Intervertebral disc: nucleus pulposus inside annulus fibrosus

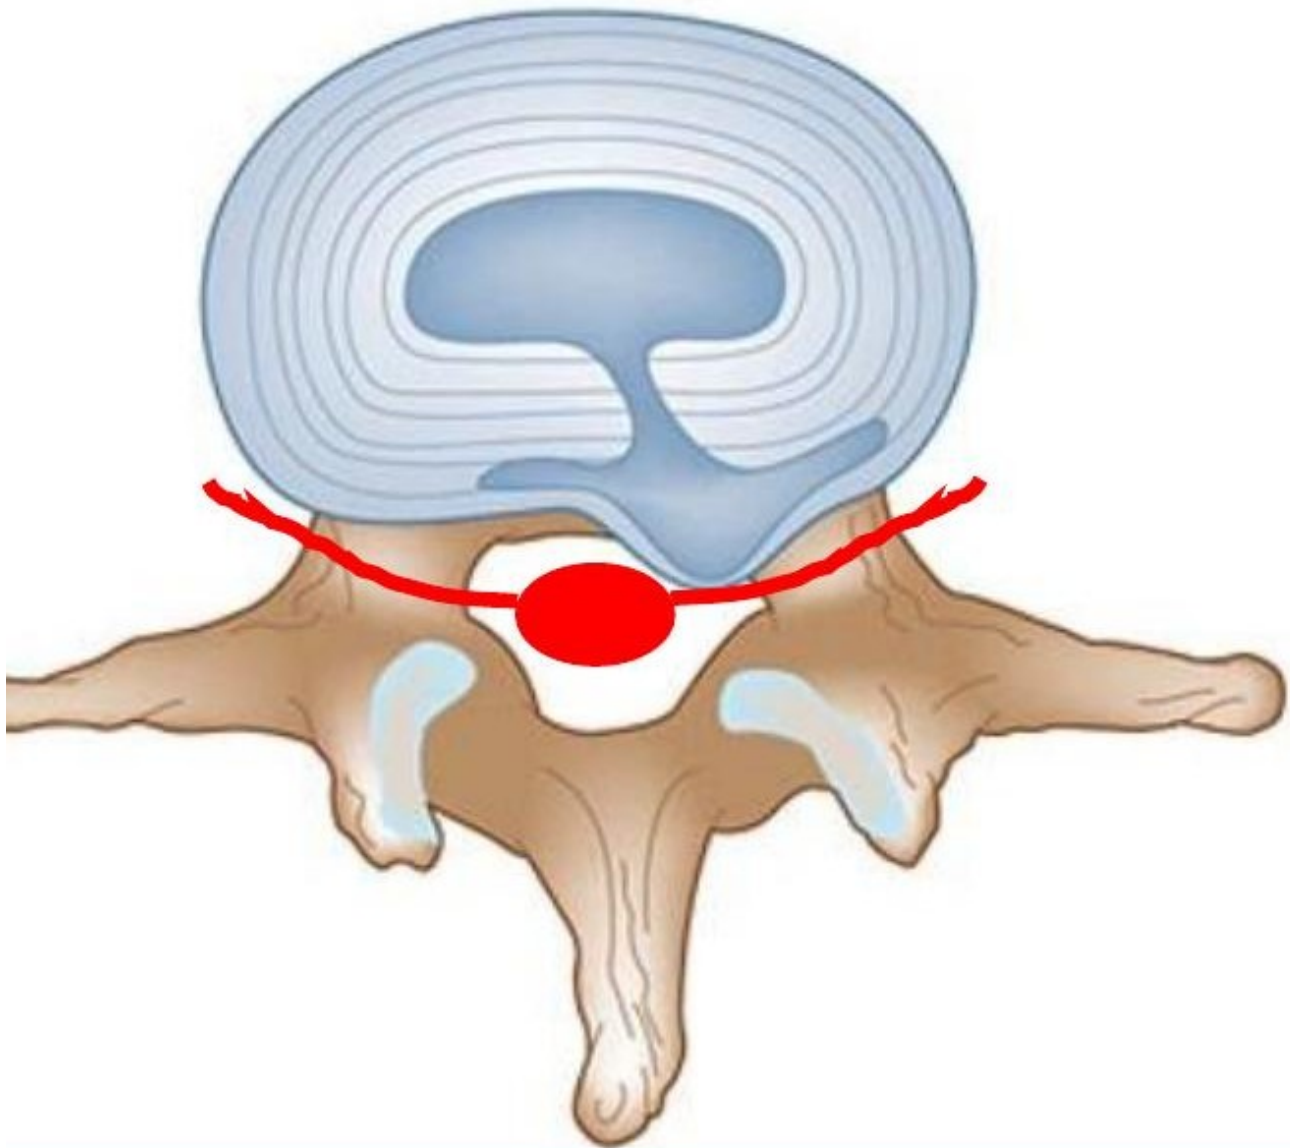

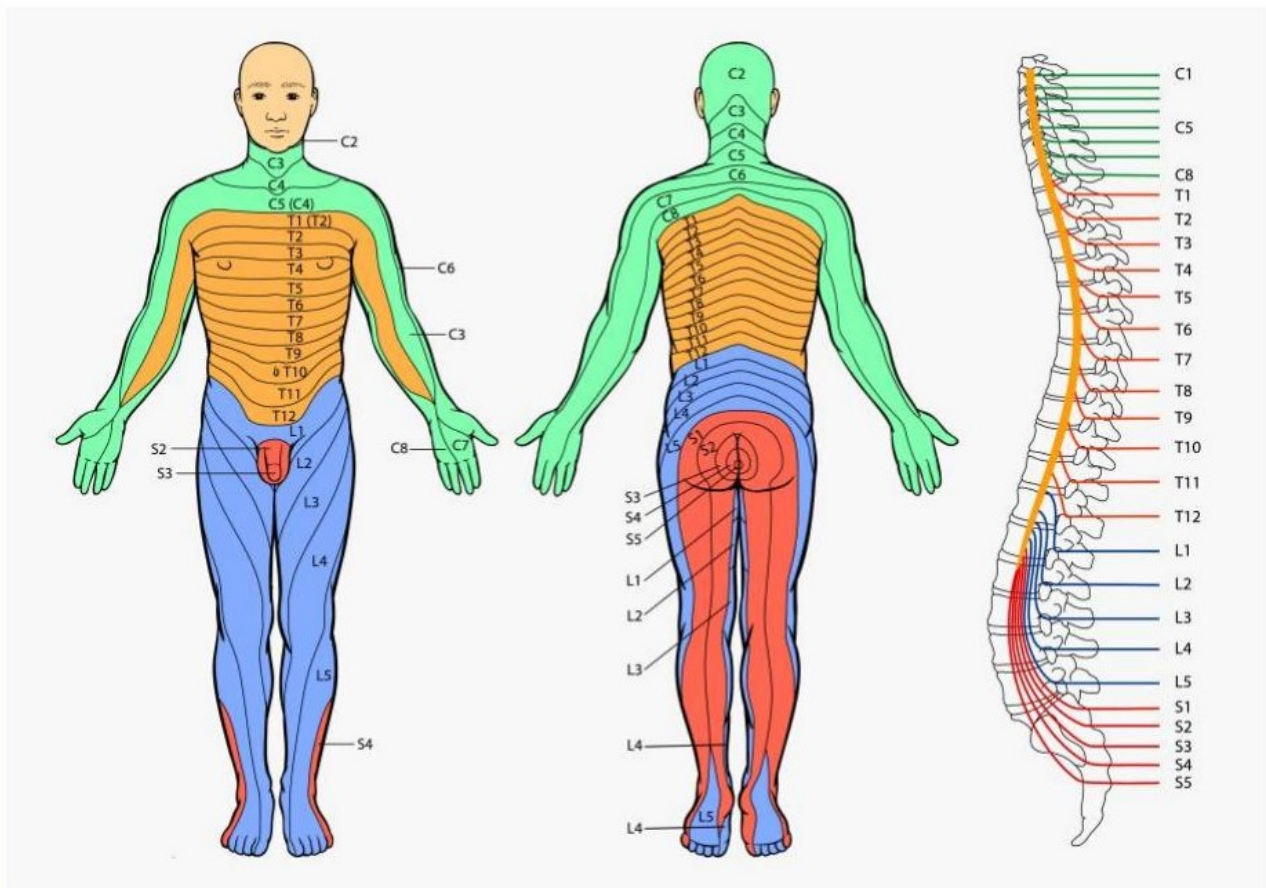

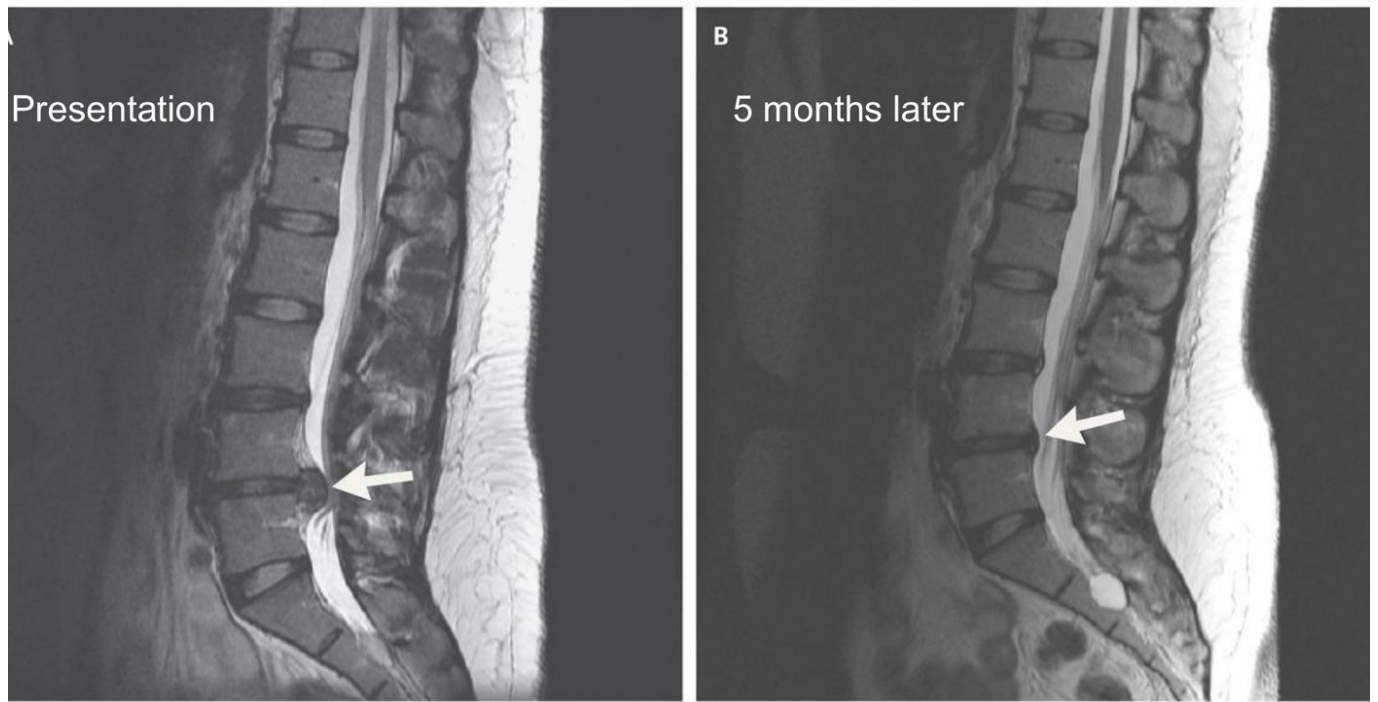

Figure L1.4 — Disc herniation contacting exiting nerve root

* An inaccurate but commonly used lay descriptor

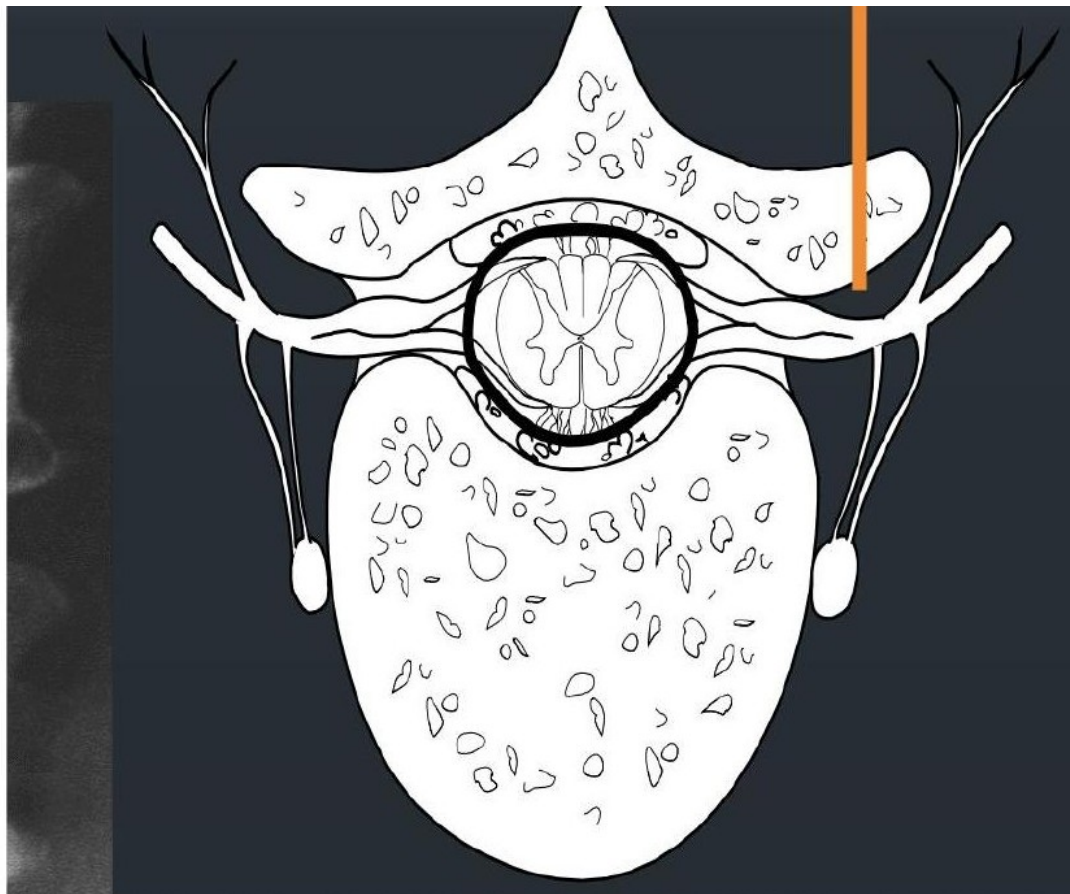

Figure L1.5 — Dermatome map of body

resolution in two thirds of cases after six months.

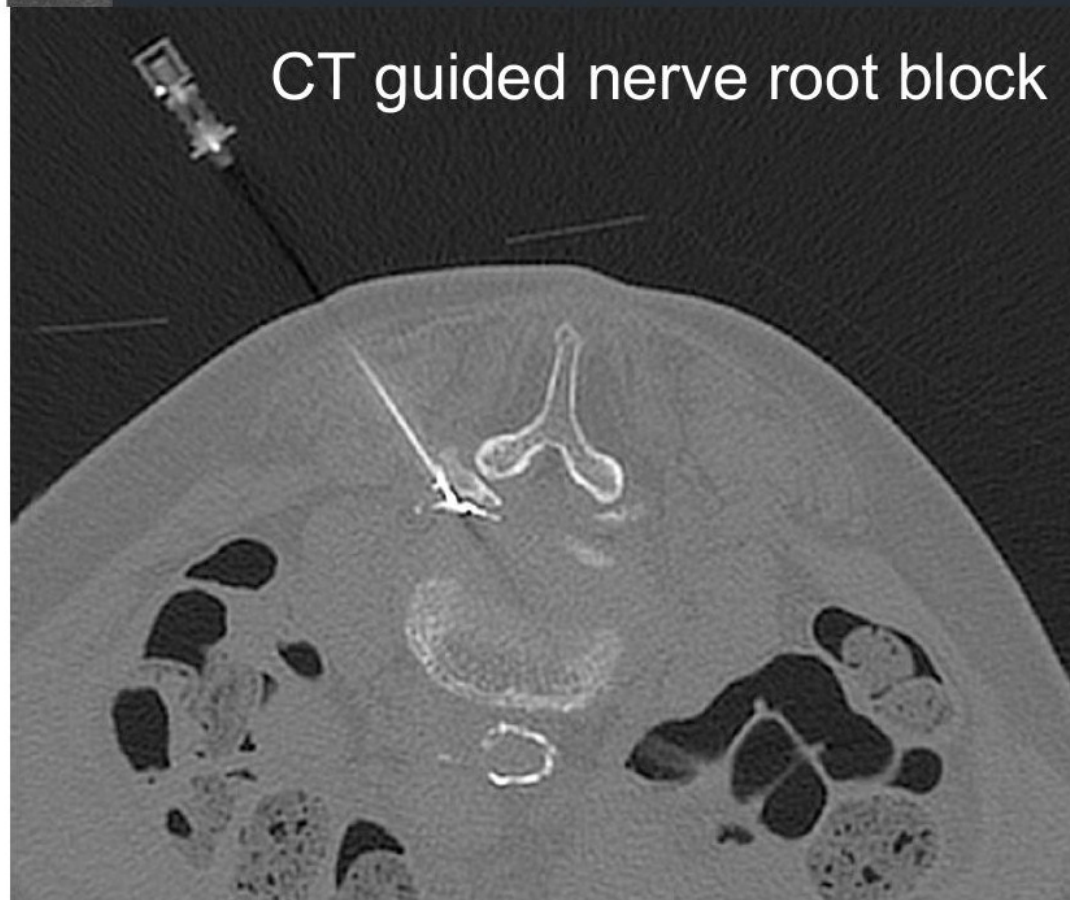

From Hogg J, Bell DA, N Engl J Med 2010;374:41

Figure L1.12 — Spontaneous regression of herniated disc over 5 months

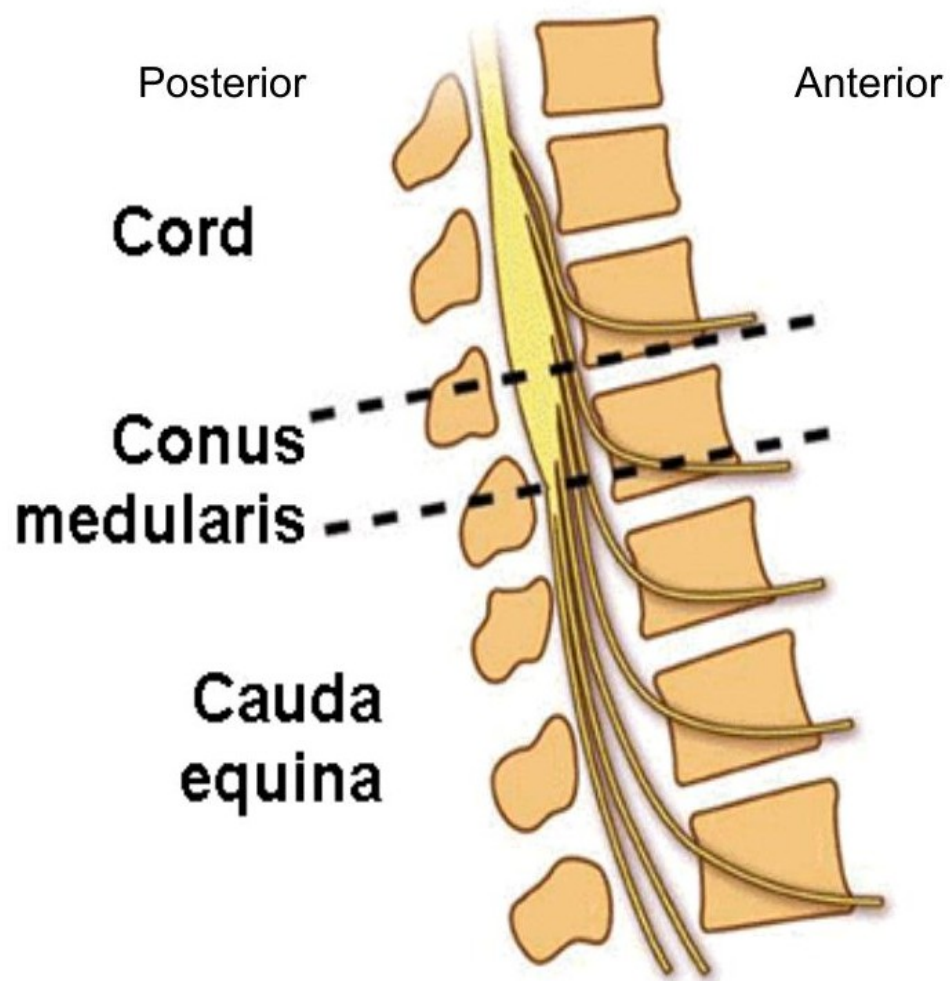

CT guided nerve root block

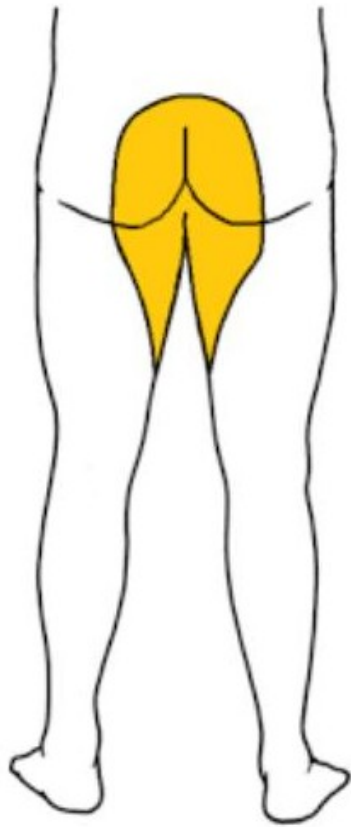

y

Figure L1.11 — CT-guided nerve root block (needle into foramen)

*|
||

Figure L1.2 — Termination of cord at L2; conus medullaris and cauda equina

pine**

ony mets, myeloma, TB, paraspin

Figure L1.6 — Saddle anaesthesia distribution

- Focally tender over thoracic spine

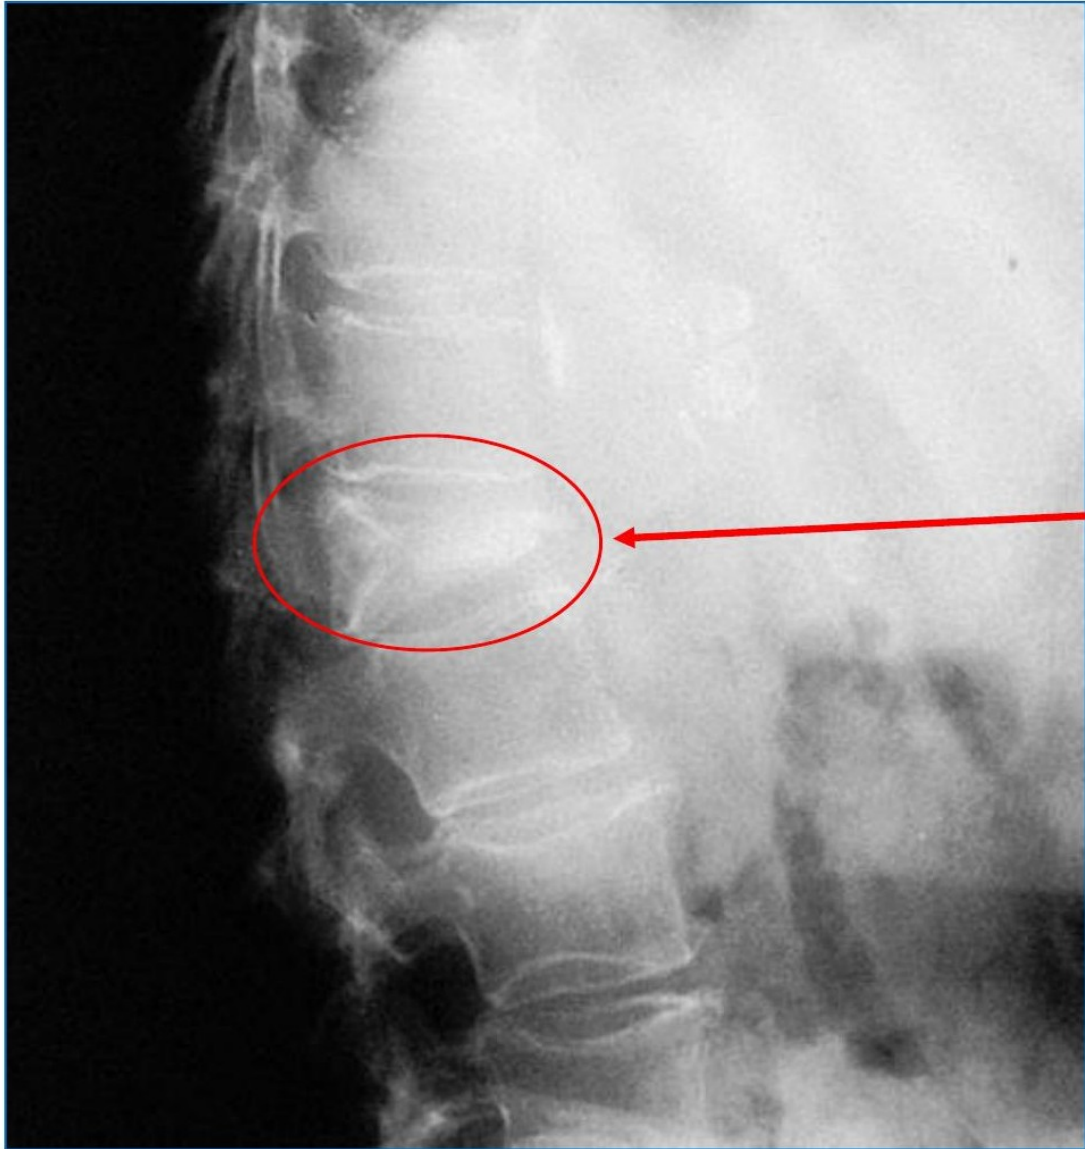

Figure L1.8 — Osteoporotic wedge fracture (anterior height loss, 'pancake' deformity)

Figure L1.9 — Second wedge fracture (lower lumbar)

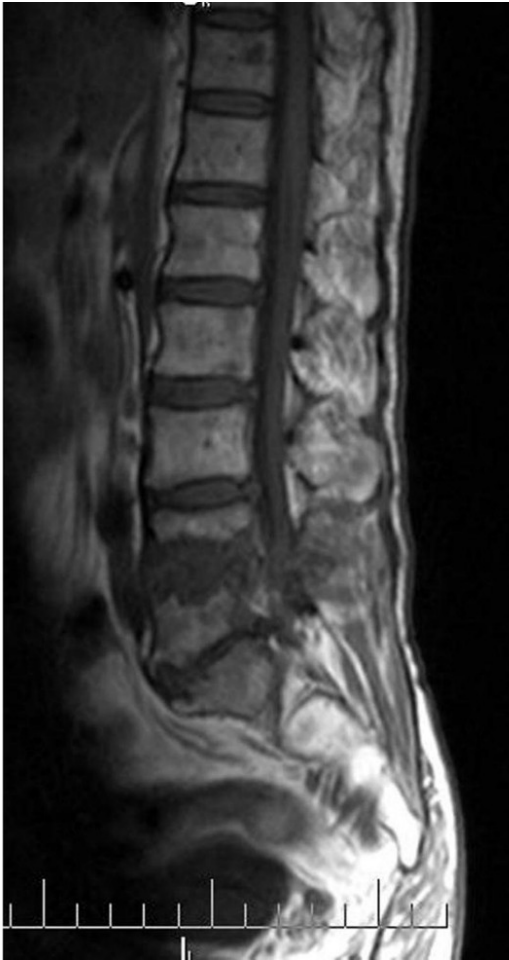

Figure L1.10 — TB spine: vertebral destruction, discitis, paraspinal abscess on MRI

Ankylosing spondylitis — loss of spinal movements

Severe spinal deformity due to chronic /

Figure L1.16 — Ankylosing spondylitis: loss of lumbar flexion (left) and severe fixed-flexion deformity (right)

Dactylitis ('sausage fi
due to enthesitis

Figure L1.14 — Dactylitis (whole-finger swelling from enthesitis)

Anterior uveitis

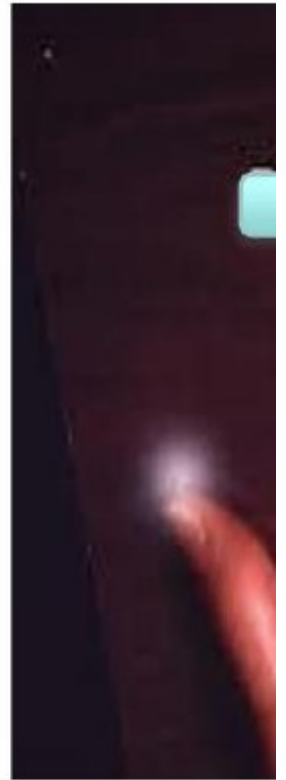

Figure L1.13 — Anterior uveitis (red, painful eye)

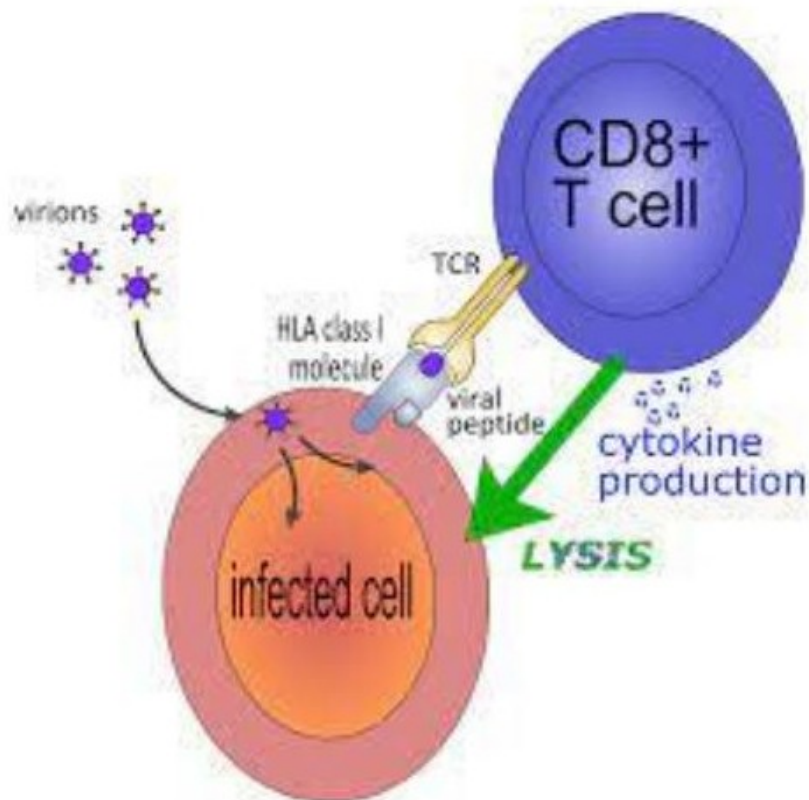

c)

Psoriasis

typically on extensor surfaces

Figure L1.15 — Psoriasis on extensor surface

Physiological role of class 1 HLA in peptide presentation to CD8+ T cells

Figure L1.17 — Physiological role of MHC class I: peptide presentation to CD8+ T cells

Figure L1.20 — Bridging syndesmophytes / spinal fusion in untreated AS

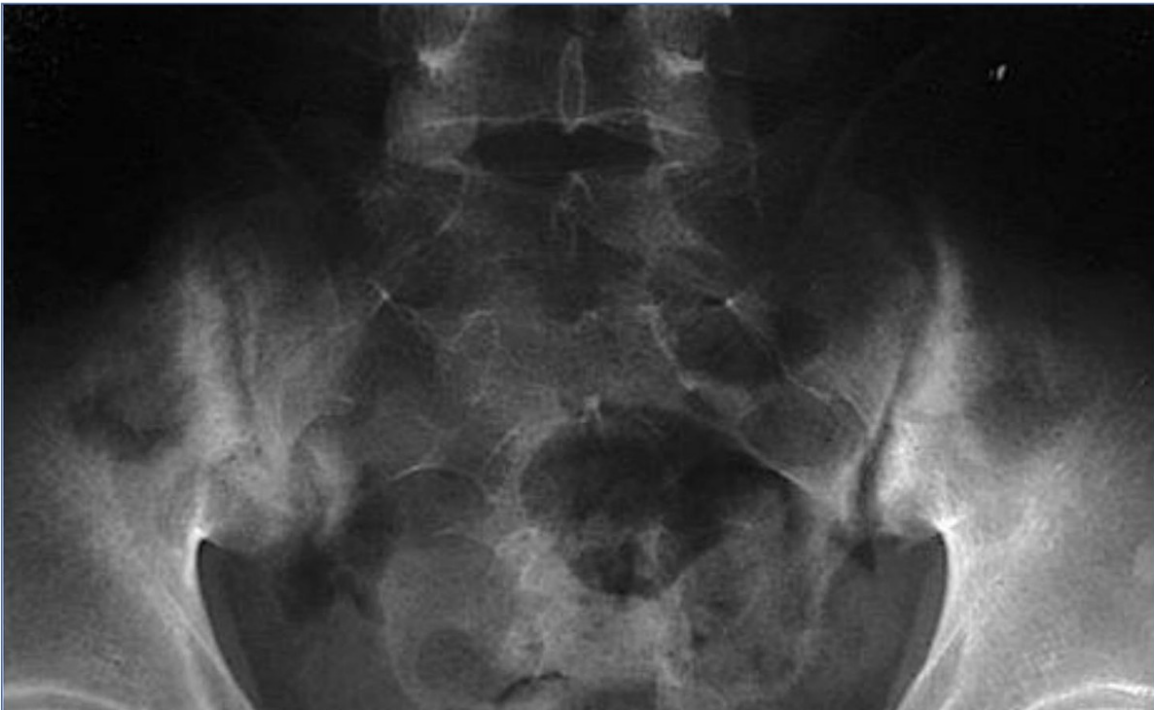

Figure L1.18 — Radiographic sacroiliitis on AP pelvis (irregularity, sclerosis)

Sacro-iliitis on MRI

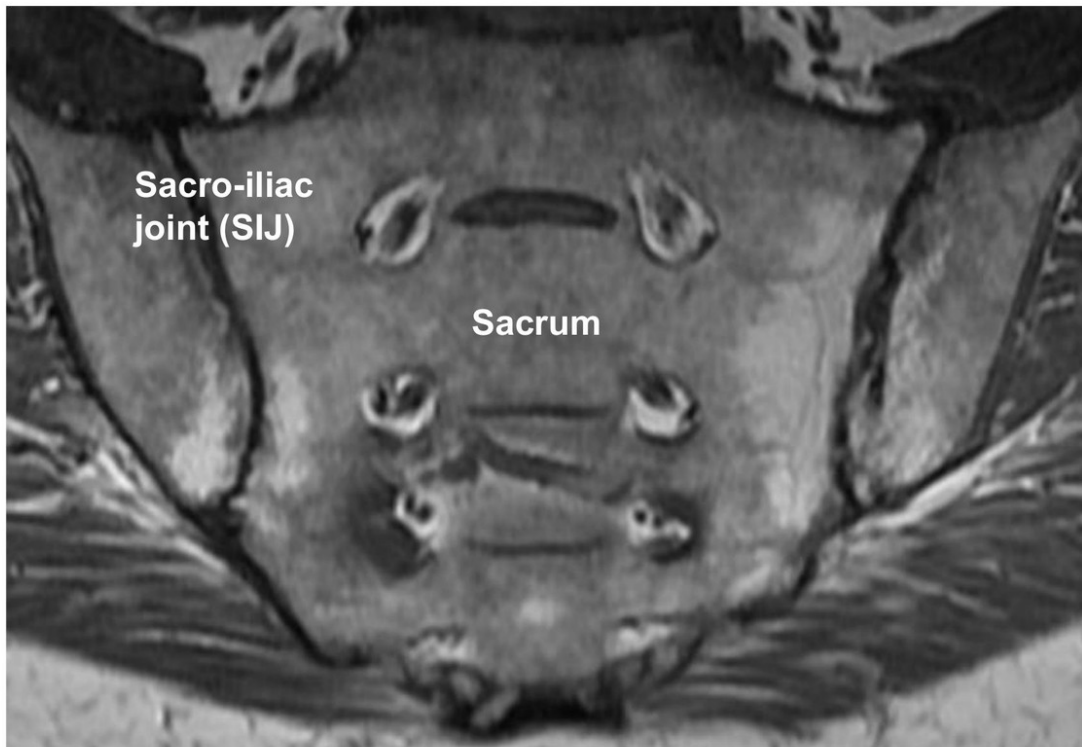

Figure L1.19 — Sacroiliitis on MRI: bone marrow oedema at SIJs

Figure L1.21 — 'Shiny corners' sign on MRI (vertebral corner oedema, L4/L5/S1)

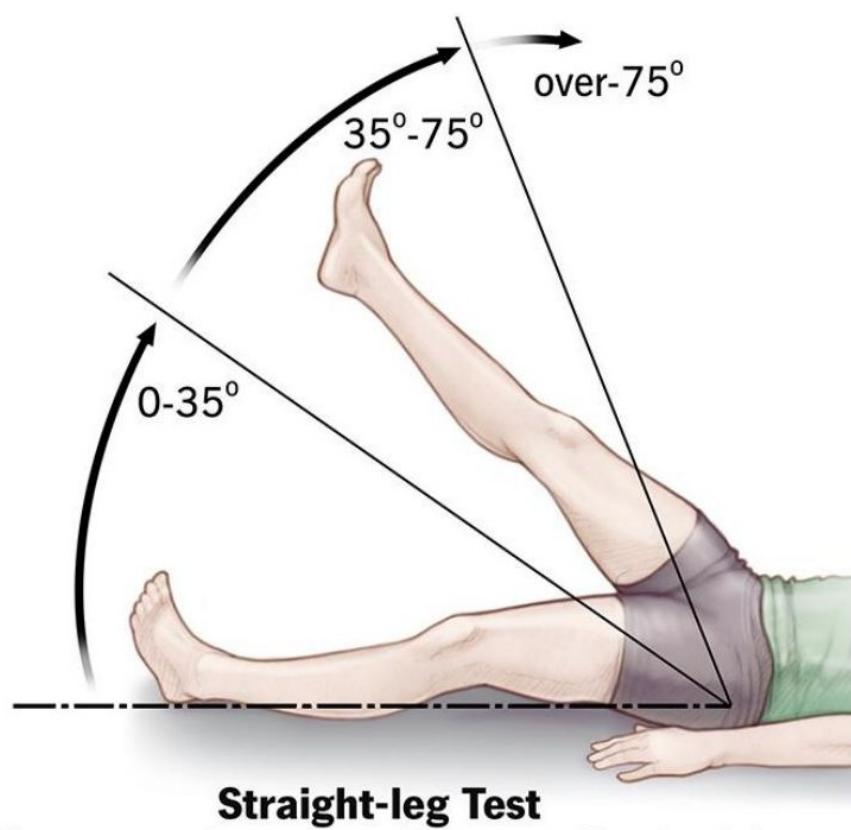

Figure L1.7 — Straight leg raise test angles
