

GASTRO-L7 — GIT Infections — Companion Figures

Figure GASTRO-L7.1 — AXR Day 4: mild colonic dilatation, early fulminant C. difficile colitis.

AXR

Figure GASTRO-L7.2 — AXR Day 7: grossly dilated transverse colon, loss of haustra — toxic megacolon (>6 cm cut-off).

CXR

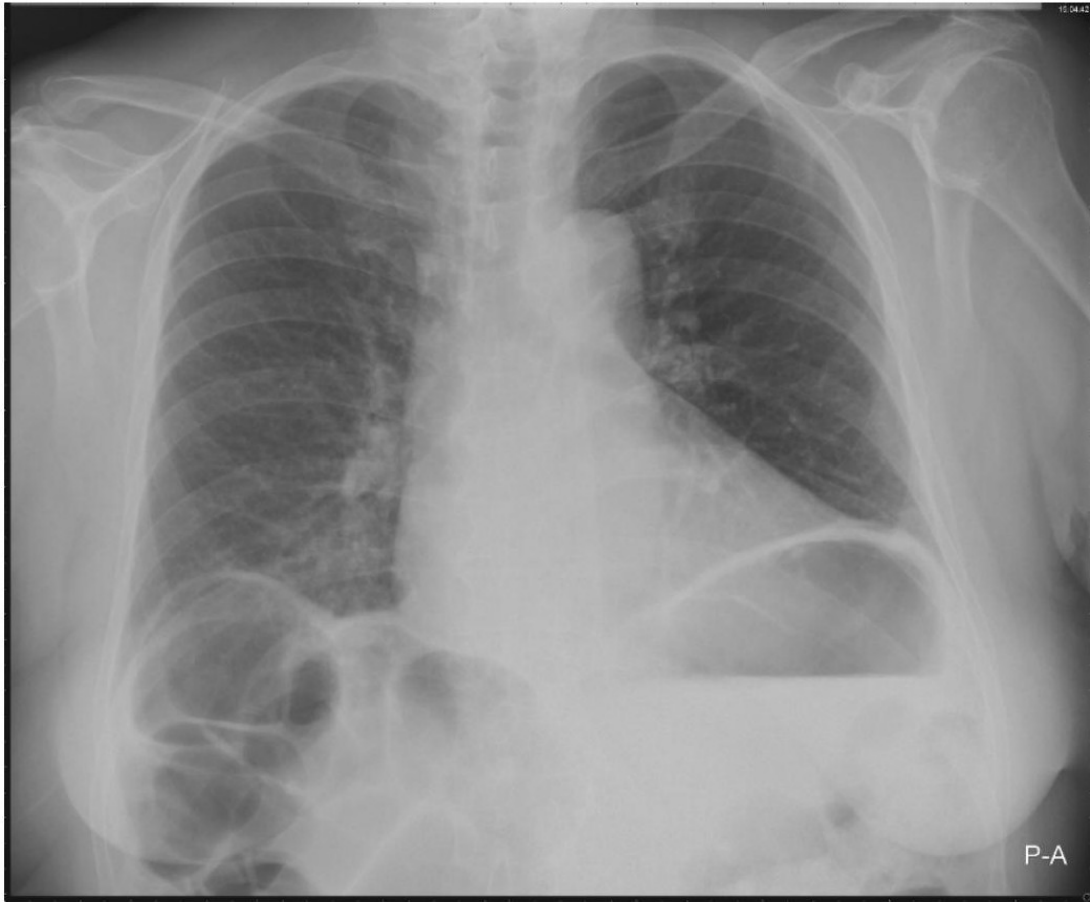

Figure GASTRO-L7.3 — Erect CXR: free air under right hemidiaphragm — colonic perforation.

Figure GASTRO-L7.4 — Pseudomembranous colitis on colonoscopy: yellow-white plaques (pseudomembranes) on inflamed mucosa.

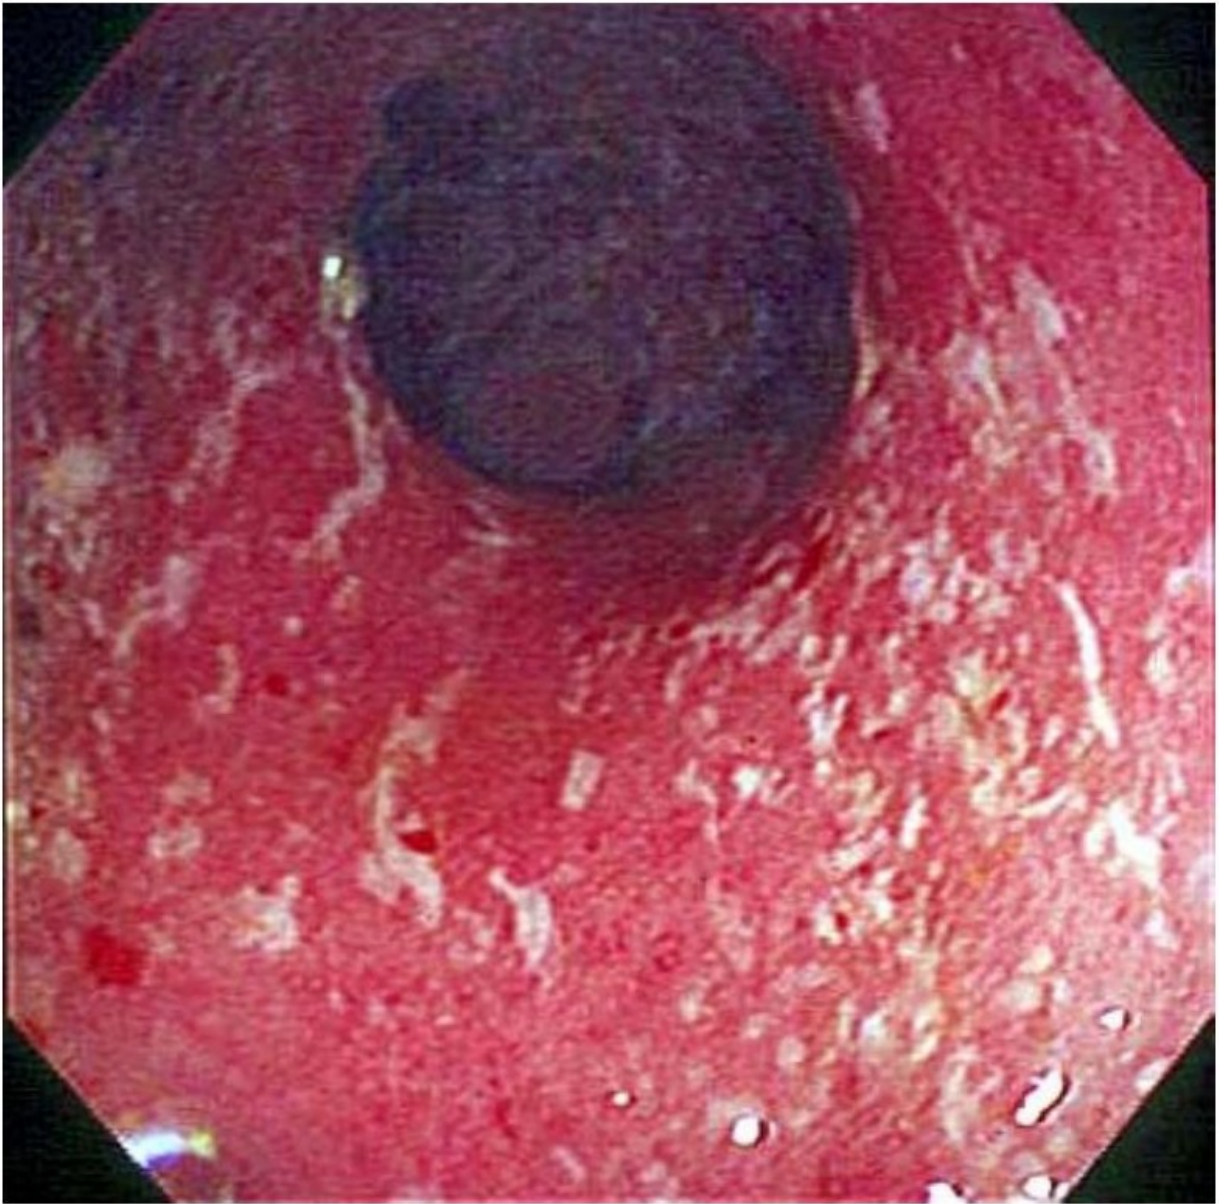

Figure GASTRO-L7.5 — UC on colonoscopy: continuous erythematous, granular, friable mucosa with loss of vascular pattern.
