

Upper GI Disorders

Companion Figures

Lecture transcript: Mohammed Azeem, 7 Jan 2026

Tutorial slides: Loay Tawfik, 8–9 Jan 2026

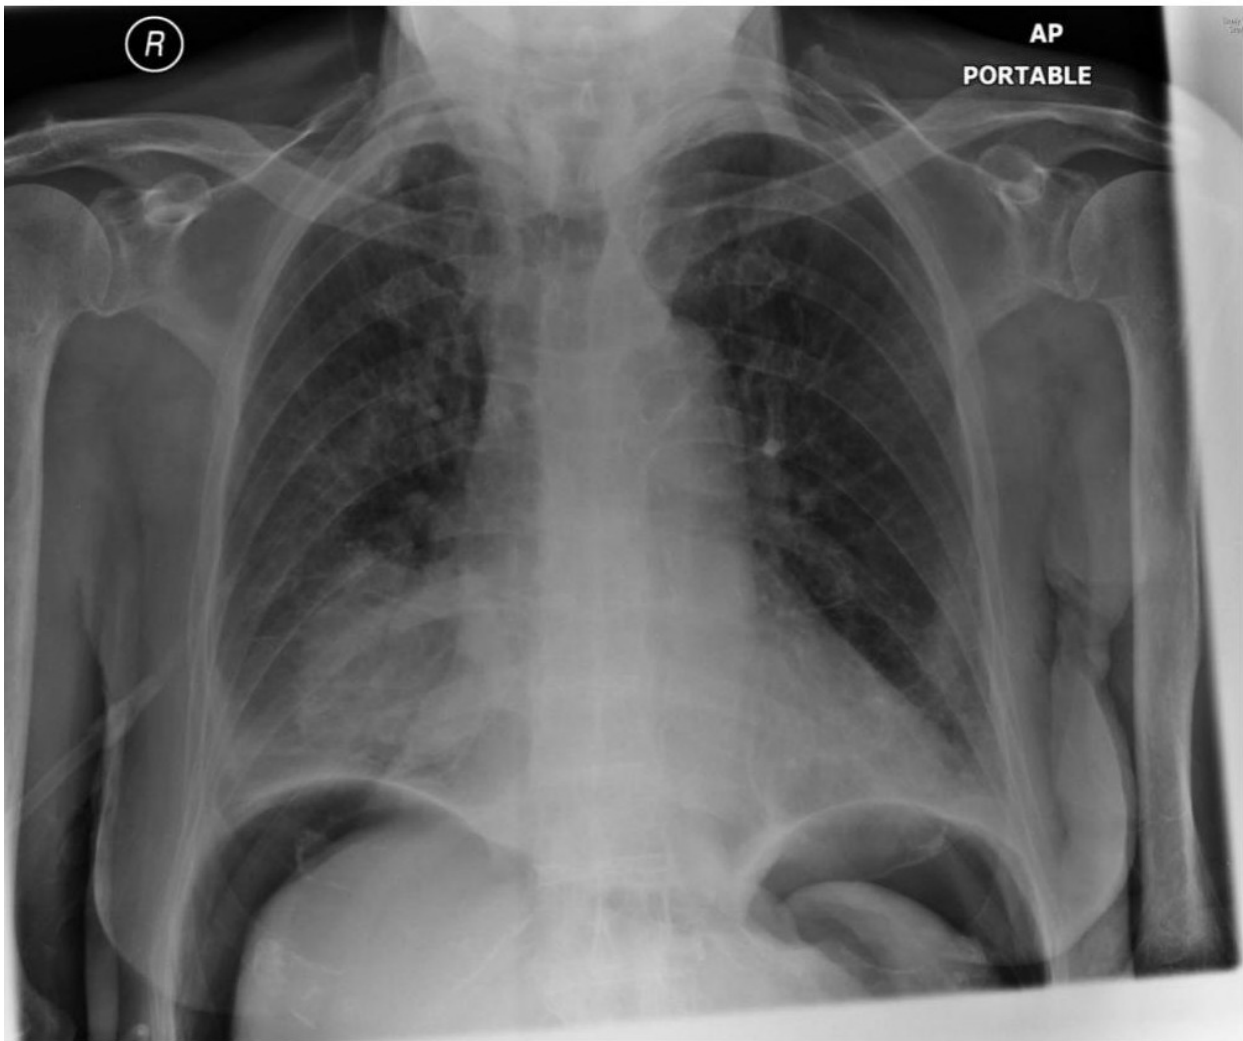

Figure L1.1 — Erect CXR showing free subdiaphragmatic air (pneumoperitoneum).

Figure L1.2 — AXR showing Rigler's sign (gas on both sides of bowel wall = free intraperitoneal air).

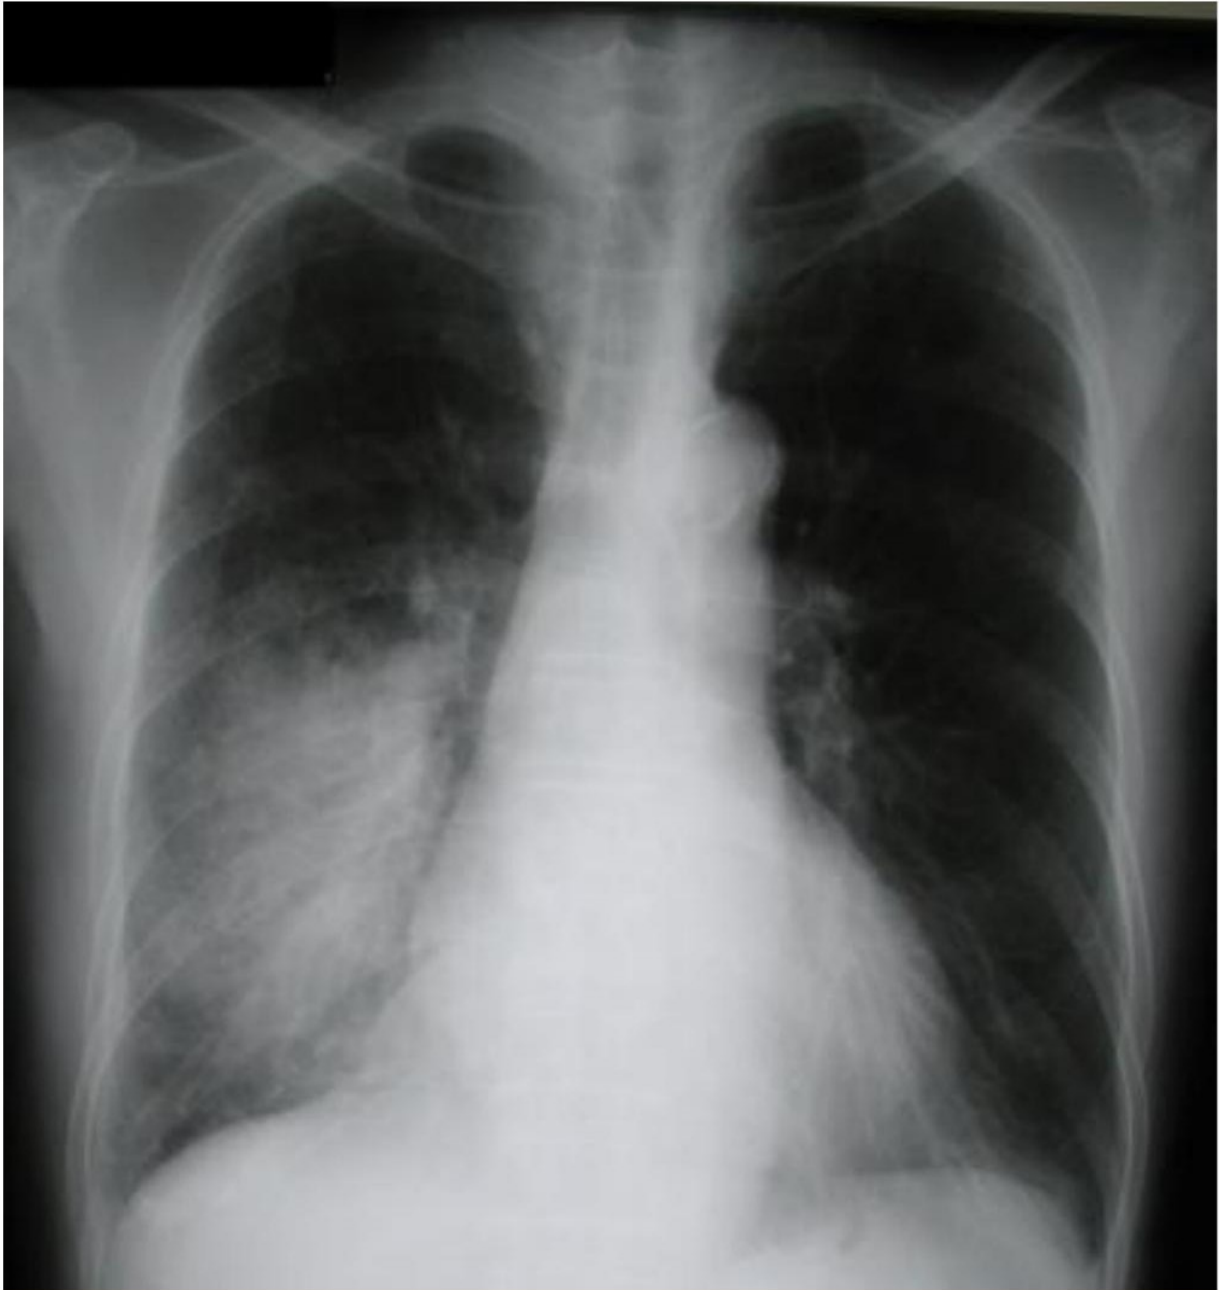

Figure L1.3 — Day-3 post-operative CXR showing right basal consolidation (post-operative pneumonia / aspiration).

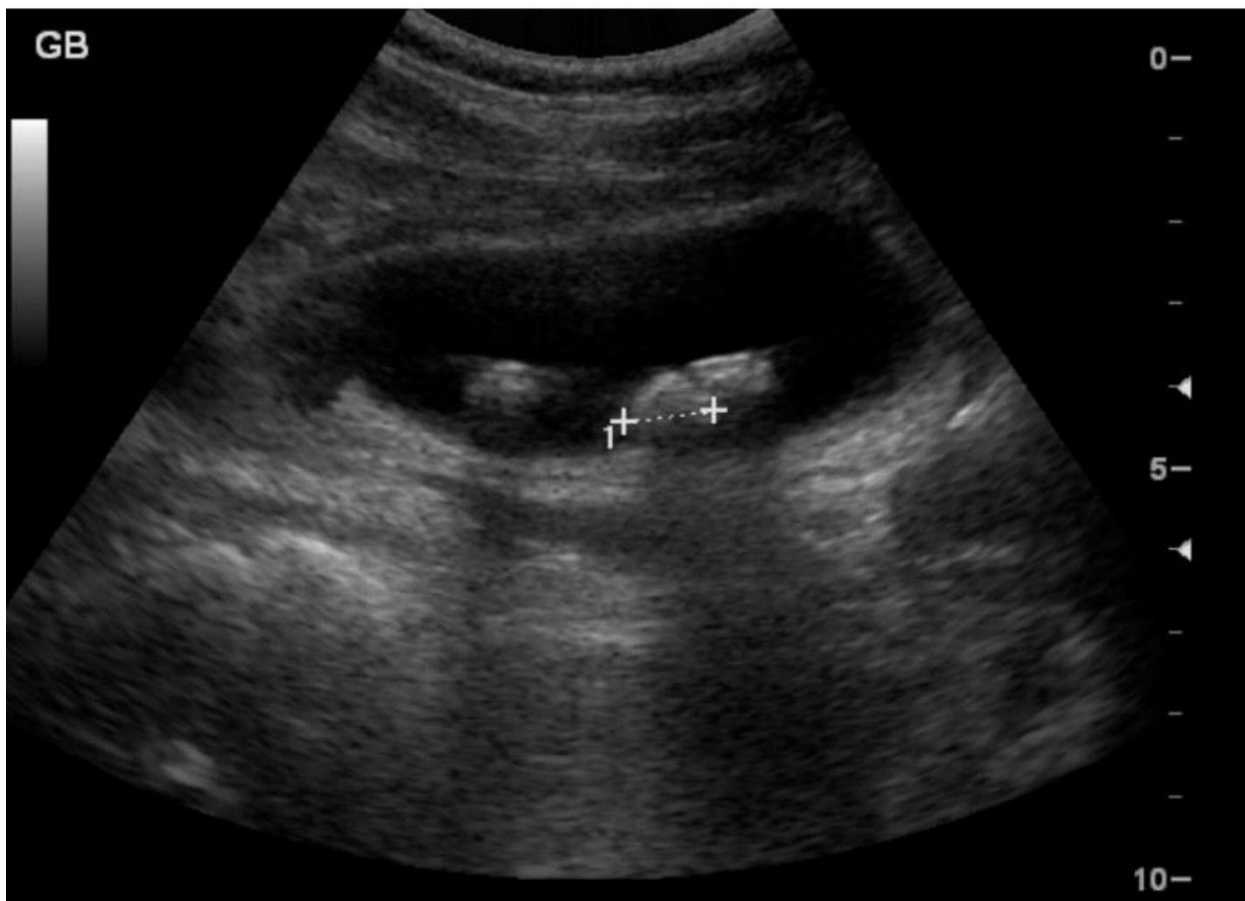

Figure L1.4 — Abdominal ultrasound showing echogenic foci with posterior acoustic shadowing in the gallbladder = gallstones.

Figure L1.5 — MRCP showing a filling defect in the common bile duct (retained CBD stone).

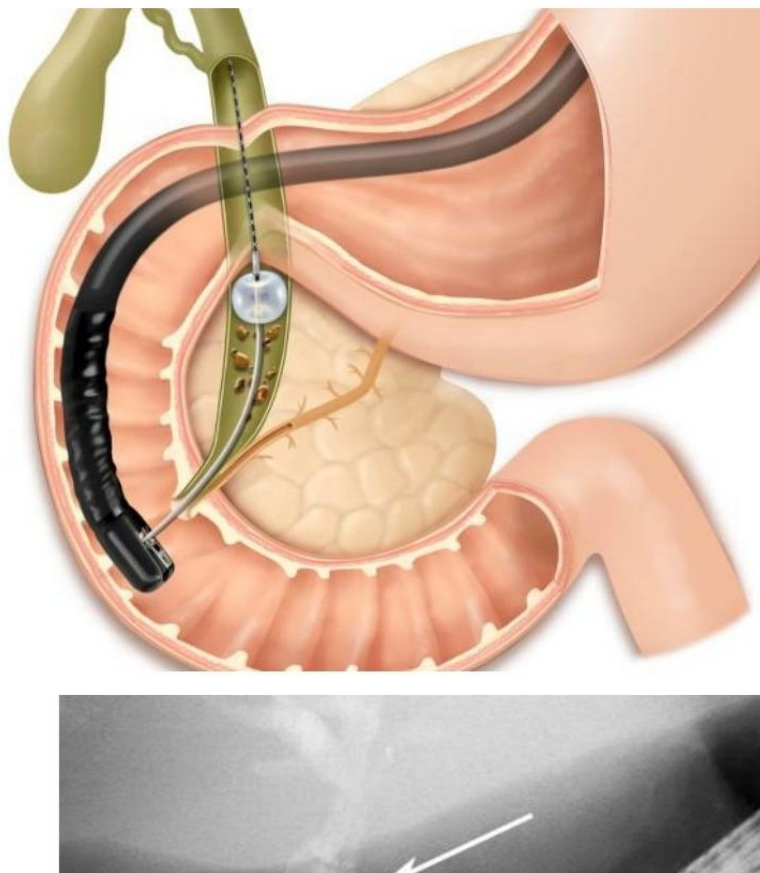

Figure L1.6 — Schematic of ERCP: side-viewing duodenoscope at the major duodenal papilla, cannulating the CBD.

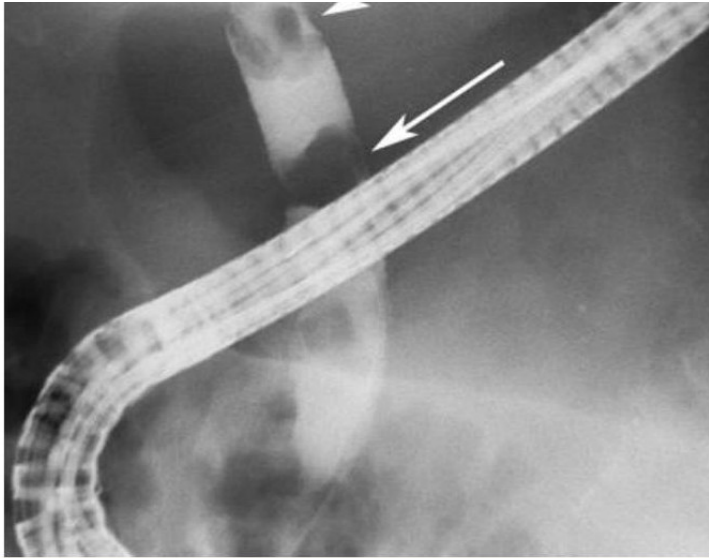

Figure L1.7 — ERCP fluoroscopy showing CBD stone (white arrows) above the duodenoscope.
